Accessibility conformance report: Excavation/Utility Tap-in Permit Process: questions and answers (City of Oberlin)

Prepared 2026-11-12. Source file: oberlin-excavation-faq.pdf (2 pages). Remediated file: oberlin-excavation-faq.pdf.

Summary

Before and after remediation

Check	Before	After
PDF/UA-1 machine validation (veraPDF, ISO 14289-1)	Fails: 9 rules, 433 failed checks	Passes
Tagged structure	No	Yes
Document language	Not set	en-US
Document title shown in title bar	Microsoft Word - Excavation Permit FAQ - 2018.docx	Excavation/Utility Tap-in Permit Process: questions and answers (City of Oberlin)
Bookmarks	0	0
Images with alternative text		1 of 1 tagged figures
Form fields with labels		No form fields
Text recognised from scanned images (OCR)		Not needed
Visual change (share of pixels that differ, worst page)		0.0639

Visual change is measured by rendering every page before and after and counting pixels that differ. A value near zero means the document looks the same to a sighted reader. Small non-zero values come from embedding the fonts the original only named.

What we promise, and what we do not

- The remediated file passes PDF/UA-1 machine validation in veraPDF, the reference open-source validator, unless this report says otherwise.
- The structure (headings, lists, tables, reading order) was reviewed against the page, and every image and form field was reviewed and described or labelled.
- This is not a certification and not a legal opinion. Machine validation cannot judge whether alternative text or reading order is right; that part rests on the review described below.
- Colour contrast is measured and reported, not changed.

Structure of the remediated document

Tagged elements by type

Element	Count
Figure	1
H1	1
H2	5
L	1
LBody	3

LI	3
P	14

Headings, in reading order

- Level 1: Excavation/Utility Tap-in Permit Process
- Level 2: Background
- Level 2: Who needs an Excavation/Utility Tap-in Permit?
- Level 2: How do I get an Excavation/Utility Tap-in Permit?
- Level 2: What information do I need to provide to complete the Permit Application?
- Level 2: Are there different requirements for different types of work? Yes, requirements vary:

Machine validation in detail

Failures in the original file

Rule (ISO 14289-1 clause)	What it checks	Failed checks
5-1	The PDF/UA version and conformance level of a file shall be specified using the PDF/UA Identification extension schema	1
6.2-1	The document catalog dictionary shall include a MarkInfo dictionary containing an entry, Marked, whose value shall be true	1
7.1-10	The document catalog dictionary shall include a ViewerPreferences dictionary containing a DisplayDocTitle key, whose value shall be true	1
7.1-11	The logical structure of the conforming file shall be described by a structure hierarchy rooted in the StructTreeRoot entry of the document	1
7.1-3	Content shall be marked as Artifact or tagged as real content	216
7.2-33	Natural language for document metadata shall be determined	1
7.2-34	Natural language for text in page content shall be determined	208
7.21.4.1-1	The font programs for all fonts used for rendering within a conforming file shall be embedded within that file, as defined in ISO 32000-1:20	3
7.21.4.2-2	If the FontDescriptor dictionary of an embedded CID font contains a CIDSet stream, then it shall identify all CIDs which are present in the	1

No PDF/UA-1 failures remain in the remediated file.

Colour contrast (WCAG 2.1, success criterion 1.4.3)

No text run measured below the required contrast ratio.

Checks that need human judgement (Matterhorn Protocol)

Human checks

Checkpoint	Status	How
01 Real content tagged,	Reviewed by the	Tag tree compared with the rendered pages.

decoration marked as artifact	remediator	
06/09 Logical reading order and appropriate tags	Reviewed by the remediator	Reading order and tag types checked in the tag dump against the page images.
13 Alternative text for figures is meaningful	Reviewed by the remediator	Every image looked at; alt text written for meaningful images, decorative images marked as artifacts.
14 Headings: levels reflect the document's outline	Enforced by script; reviewed	Engine never skips a level; heading text checked in review.
15 Tables: headers and scope	Reviewed by the remediator	Header cells and scope checked in the tag dump.
16 Lists tagged as lists	Reviewed by the remediator	List structure checked in the tag dump.
28 Form fields have labels; tab order follows structure	Enforced by script; reviewed	Every field has a tooltip (TU); page tab order set to structure order.
31 Text maps to correct Unicode (including OCR text)	Enforced by script; reviewed	Fonts carry ToUnicode maps; OCR text spot-checked against the image.
WCAG 1.4.3 Colour contrast (outside PDF/UA)	Measured by script	Measured by script for every text run; reported below, not changed (changing colours changes how the document looks).
Usability with a screen reader (NVDA, JAWS) in Adobe Acrobat Reader	Not done	Not part of this deliverable unless stated: no screen-reader session was recorded for this file.

Known limitations of this file

- The last question ('What is the time frame for the Excavation/Utility Tap-in Permit process?') is printed run-in with its answer on the same line, so it is read as the start of its paragraph rather than as a heading.

Tools

veraPDF 1.30.4 (PDF/UA-1 validation); qpdf and pikepdf (PDF structure); PyMuPDF (layout and rendering); OCRmyPDF with Tesseract (text recognition, when needed); LibreOffice (this report). All run locally.

The full structure tree in reading order is supplied as a separate text file.
