Summary

Before and after remediation

Check	Before	After
PDF/UA-1 machine validation (veraPDF, ISO 14289-1)	Fails: 3 rules, 3 failed checks	Passes
Tagged structure	Yes	Yes
Document language	EN-US	en-US
Document title shown in title bar	Conflict of Interest Policy	Conflict of Interest Policy 2.03 (Whatcom County Library System)
Bookmarks	0	0
Images with alternative text		1 of 1 tagged figures
Form fields with labels		No form fields
Text recognised from scanned images (OCR)		Not needed
Visual change (share of pixels that differ, worst page)		0.0000

Visual change is measured by rendering every page before and after and counting pixels that differ. A value near zero means the document looks the same to a sighted reader. Small non-zero values come from embedding the fonts the original only named.

What we promise, and what we do not

- The remediated file passes PDF/UA-1 machine validation in veraPDF, the reference open-source validator, unless this report says otherwise.
- The structure (headings, lists, tables, reading order) was reviewed against the page, and every image and form field was reviewed and described or labelled.
- This is not a certification and not a legal opinion. Machine validation cannot judge whether alternative text or reading order is right; that part rests on the review described below.
- Colour contrast is measured and reported, not changed.

Checks that machine validation cannot settle (Matterhorn Protocol)

Review checks

Checkpoint	Status	How
01 Real content tagged, decoration marked as artifact	Not yet reviewed	Tag tree compared with the rendered pages.
06/09 Logical reading order and appropriate tags	Not yet reviewed	Reading order and tag types checked in the tag dump against the page images.
13 Alternative text for figures is meaningful	Not yet reviewed	Every image reviewed; alt text written for meaningful images, decorative images marked as artifacts.
