Summary

Before and after remediation

Check	Before	After
PDF/UA-1 machine validation (veraPDF, ISO 14289-1)	Fails: 8 rules, 2105 failed checks	Passes
Tagged structure	No	Yes
Document language	Not set	en-US
Document title shown in title bar	Microsoft Word - 2027 BCC Application mb	Board, Commission and Committee Application 2027 (City of Bryan)
Bookmarks	0	0
Images with alternative text		2 of 2 tagged figures
Form fields with labels		No form fields
Text recognised from scanned images (OCR)		Not needed
Visual change (share of pixels that differ, worst page)		0.0000

Visual change is measured by rendering every page before and after and counting pixels that differ. A value near zero means the document looks the same to a sighted reader. Small non-zero values come from embedding the fonts the original only named.

What we promise, and what we do not

- The remediated file passes PDF/UA-1 machine validation in veraPDF, the reference open-source validator, unless this report says otherwise.
- The structure (headings, lists, tables, reading order) was reviewed against the page, and every image and form field was reviewed and described or labelled.
- This is not a certification and not a legal opinion. Machine validation cannot judge whether alternative text or reading order is right; that part rests on the review described below.
- Colour contrast is measured and reported, not changed.

WCAG 1.4.3 Colour contrast (outside PDF/UA)	Measured by script	Measured by script for every text run; reported below, not changed (changing colours changes how the document looks).
Usability with a screen reader (NVDA, JAWS) in Adobe Acrobat Reader	Not done	Not part of this deliverable unless stated: no screen-reader session was recorded for this file.

Known limitations of this file

- The blanks for the applicant's details, the board choices and the signature are printed lines and boxes for filling in on paper, so no fillable form fields were added.

Tools

veraPDF 1.30.4 (PDF/UA-1 validation); qpdf and pikepdf (PDF structure); PyMuPDF (layout and rendering); OCRmyPDF with Tesseract (text recognition, when needed); LibreOffice (this report). All run locally.

The full structure tree in reading order is supplied as a separate text file.
