Summary

Before and after remediation

Check	Before	After
PDF/UA-1 machine validation (veraPDF, ISO 14289-1)	Fails: 5 rules, 9 failed checks	Passes
Tagged structure	No	Yes
Document language	Not set	en-US
Document title shown in title bar	1874_001.pdf	Notice of Public Hearing: Special Ordinance 26, 2026 (City of Terre Haute)
Bookmarks	0	0
Images with alternative text		0 of 0 tagged figures
Form fields with labels		No form fields
Text recognised from scanned images (OCR)		Yes
Visual change (share of pixels that differ, worst page)		0.0000

Visual change is measured by rendering every page before and after and counting pixels that differ. A value near zero means the document looks the same to a sighted reader. Small non-zero values come from embedding the fonts the original only named.

What we promise, and what we do not

- The remediated file passes PDF/UA-1 machine validation in veraPDF, the reference open-source validator, unless this report says otherwise.
- The structure (headings, lists, tables, reading order) was reviewed against the page, and every image and form field was reviewed and described or labelled.
- This is not a certification and not a legal opinion. Machine validation cannot judge whether alternative text or reading order is right; that part rests on the review described below.
- Colour contrast is measured and reported, not changed.

Not measured: the visible text is part of a scanned image.

06/09 Logical reading order and appropriate tags	Reviewed against the page	Reading order and tag types checked in the tag dump against the page images.
